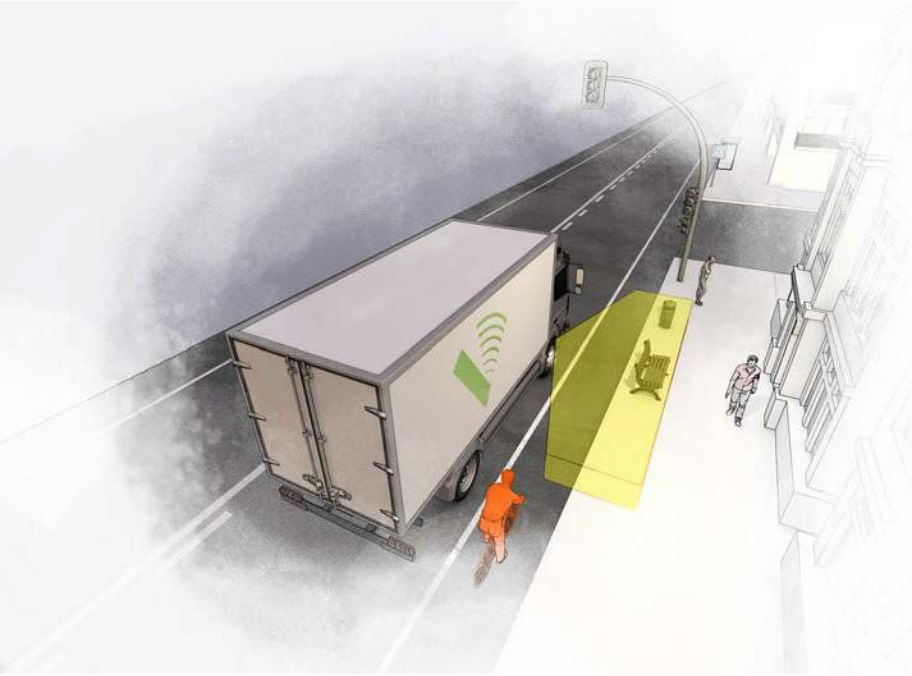
PREVIEW SIDE DEFENDER®II

RADAR ELECTRONICS

Add Vulnerable Road User (VRU) protection with PreView Side Defender®II. The Side Defender II radar is the most advanced side object detection and VRU protection radar available for on-road medium and heavy-duty trucks. Side Defender II is the next generation of side blind zone collision mitigation.

SIDE OBJECT DETECTION - BUILT TOUGH FOR HEAVY-DUTY INDUSTRIES



Intelligent Operating Modes

Urban VRU Mode: <30 km/h

- Designed for slow-speed urban environments and passenger side turns
- Alerts on moving bicycles, pedestrians, motorcycles, etc.
- Ignores stationary objects such as parked cars and street signs

Lane Change Mode: >30 km/h

- Designed for lane change maneuvers
- Alerts on moving cars, bicycles, motorcycles, etc.
- Ignores stationary guardrails and similar

Rugged. Reliable. Flexible.

Rugged design, engineered to operate in all weather conditions

Provides the operator audible and visual in-cab active alerts

Ability to report sensor data to a logging device or telematics application
