

PreView WorkSight® for Waste

Waste workers have to deal with the challenges of busy neighborhoods and crowded cities. They require a safety solution they can count on in any situation. PreView WorkSight ensures that your fleet has the blind spot coverage it needs, when and where it's needed.

Engineering and manufacturing heavy-duty blind spot safety solutions for over 70 years.

Our mission is to help keep fleet drivers, workers on the ground, and the public free from harm.

UNIQUE DETECTION PATTERN

PreView WorkSight has a unique bell shaped detection pattern. This ensures that you have the coverage you need directly behind your bumper and gets wider farther out to aid in backing maneuvers.

COMPLETE COVERAGE

WorkSight is equipped with dual antennas. While one antenna is providing close-to-the-bumper coverage, the other antenna is busy detecting objects farther away giving your operators complete blind spot protection.

WIRELESS OPTION

WorkSight is available in a wireless option that is uniquely suited for rear loading waste trucks. By eliminating the body harness, Wireless reduces installation time by up to 60%.

Wireless Display

LED Display

HOW IT WORKS

- The detection area is divided into five zones that represent collision potential.
- If a person or object is detected in any of the zones, WorkSight sends a message to the display.
- The display gives a zone appropriate audible and visual alert to warn the operator.
